The original article [1] contained an error mistakenly carried forward by the production team which handled this article whereby the caption for Table 1 was incorrectly labeled as ‘**Table 1** Summary of key validation parameters of the three immunoassays and LC-HRMS method’.

The caption has since been corrected to: ‘**Table 1** Exemplar quotes for each theme from key informants (n=4) engaged in the provision of gender-affirming and abortion care, 2023’.
